

Is AWRA-UW for me?

The AWRA-UW student chapter may be a great place for you if you are a UW student and:

- Study water or care about water-related issues
- Want to participate in ecological service projects, like creek and trail restoration
- Want to go on field trips, such as snow-shoeing treks, hydroelectric dam visits, and river/kayak trips
- Want the support of an active professional chapter who may serve as collaborators, mentors, and potential career brokers
- Want to be a part of a distinguished professional organization that studies water resources from a variety of perspectives

UNIVERSITY OF
WASHINGTON
CHAPTER

AWRA

Community, Conversation, Connections

What is the AWRA all about?

Water is an invaluable resource to society, wildlife, fish, and the environment. The American Water Resources Association of the University of Washington (AWRA-UW) understands the importance of water and exists to learn about different aspects of water. The primary objective of the UW Student Chapter is to draw together stu-

dents that are interested in water resources and related issues. The Student Chapter is open to all colleges and departments of the UW. Our strength lies in the interdisciplinary communication that we can provide, and we encourage people from all fields to come and participate. The interaction among students is facilitated by events sponsored by the Student Chapter, so we invite you to come join us on any and all of these occasions and see what we're all about.

Events

The AWRA-UW is open to student ideas on events related to water resources. In the past, activities have included:

- Field trips
- River tours
- An annual mixer with the professional AWRA chapter
- Water-related environmental stewardship projects
- Brown-bag lunch seminars
- Special presentations
- Screenings of movies related to water resources
- *And much more!*

Conferences

The AWRA-UW student chapter is invited to the annual Washington section conference, which is typically held in Seattle every November. At the conference, students are provided with the opportunity to network with professionals, exhibit research during posters sessions, and listen to numerous talks from various professional and academic speakers.

Mentoring Program

The Washington State Chapter also has a mentoring program to help pair students with water resource professionals. Visit <http://earth.golder.com/WAAWRA/ASP/Students.asp> for more details!

Fellowships

Every year the Washington professional chapter of the AWRA generously awards up to two students each with a **\$2,000** fellowship and a one-year membership to the state and national AWRA organizations, a one-year subscription to the Journal of the American Water Resources Association, and free admission to the annual Washington section conference.
