

This math assignment is a graph of how far a third grader can blow a pattern block across a table. This is an example of Aurora's work compared to another student's work. While Aurora has labels, numbers, and bars on her graph, she is lacking appropriate labels, the correct information, and other components such as the clump, gap, outlier, and the typical length a third grader blew a pattern block.

Aurora's Graph:

ELL Student's Graph:

Clump 8-26

Gap X

Outlier X

typical 14 and 16
