

Introducing...

Carmen

the Kid

Personal

Carmen is 8 years old and lives in Sequeria, Uruguay with her Mother, Father, Sister, and Brother. Both of her siblings are literate but Carmen's Mother and Father are not. Carmen's Father didn't have much access to education he works hard as a sharecropper to make sure his children have access to the education he did not. Carmen's Mother stays at home. She could barely sleep the day she received her OLPC, she spent hours thinking all she could learn and do with it.

Aspirations

Carmen wants to be a teacher and foster education in her home town; she wants to be able to give back to her community in the way that she has been a chance. She is a good student but also likes to laugh and have fun, which sometimes gets her in trouble with the teacher.

Sports and Hobbies

When not helping her Mom around the house Carmen loves to play soccer and basketball with all her friends. She especially likes to get together with her friends Sunday morning right after church. Carmen loves to play games on her new laptop too and likes to challenge herself against the laptop to see if she can beat it. She especially likes the word games. All Carmen's friends who have a OLPC laptop love to get together after school and on the weekends and play games on them.

"I have an hour to help mama before class begins"
