

This is my body for my lifespan.

Beyond my body, billions others like me live. A very small number of these people I have personally interacted with. I have known some for many years (my family and long term friends) and others for less time. But all share much in common with me: the potential for deep and meaningful subjective experience thanks to our shared biology.

My life experience has taught me how marvelous and wonderful life can be in this universe of ours. Sorrows, yes...but joys too. But then I think of all those who live under regimes of violence and structural violence: local, state, communal, familial—and I wish peace to them and want to do my part to bring peace and trust to their lives. WPSR is that work.

But then I think of the powers of nature that our species discovered in the twentieth century: medicines and healing potions, yes...but also awesome, awesome, awesome destructive powers unleashed by pulling apart atoms of heavy uranium and plutonium. This great power is right now in the hands of a few. Do I trust them?

All my hopes for the happiness and well-being of my species would be deeply dashed if nuclear weapons began exploding on this planet. Wouldn't all this--- all this—become irrelevant when such bombs explode? Millions of people could be wiped out instantaneously. No forecasting on this...no seismographs...

Pandora's box has not been closed. In fact, more people want to look inside. Inside lies an awesome power that demands the mutual cooperation of every human being on the planet. Any group could create this destructive technology or steal it from those who have.

The power that nuclear explosives can unleash, is, in my estimation, nature's call that WE MUST UNITE.

THE ONLY POSSIBLE SOLUTION TO STOPPING THESE TYPE OF EXPLOSIONS FROM ENGULFING THE EARTH IS UNIVERSAL HUMAN RIGHTS FOR ALL!!! AND IMMEDIATE CONTAINMENT AND DE-ALERTING OF ALL NUCLEAR ARSENAL BY ALL COUNTRIES WHO HAVE THEM READY TO GO. Humans who have full human rights will not nuke each other. That is my belief.

This requires exquisite understanding, empathy, and compassion for all human groups on our planet. How can I—how can we at WPSR—usher in an era of universal human rights and alert all about what is now possible in our day in age. Have you heard? People can blow up continents now!

I pray that this message is heard by all. I do not trust those who hold the nuclear weapons power now. What do I do? If this threat is not contained, then all life-sustaining work becomes irrelevant.
